Dear Ms. Marsilio:

NUS Corporation is under contract to the U.S. Environmental Protection Agency (EPA) as a technical and management services contractor in support of the EPA's hazardous waste site assessment activities. In this support activity, the NUS Field Investigation Team (NUS/FIT) has been assigned the task of conducting a Sampling Effort of Bridgeport Name Plate Inc. located at 585 & 591 Fan Hill Road in Monroe, Connecticut.

As we discussed during our June 19, 1991 telephone conversation, NUS/FIT has scheduled a site visit for this property on week of August 5, 1991, weather permitting. I will contact you before then to determine a precise field date. Proposed onsite activities will include a site reconnaissance and the collection of environmental samples.

Your cooperation is requested in giving EPA and their representatives access to complete this activity. In order for us to plan successfully, we would appreciate your signing the enclosed EPA access agreement and returning it two weeks from date sent in the envelope provided. A copy is provided for your records.

If you request, we will provide to you replicate samples in appropriate sample containers, in case you wish to have the samples analyzed at a laboratory of your choice at your expense. If you would like NUS to collect these samples, please inform me when you return the signed access agreement so that I can plan accordingly. You or your representative will need to be available at the completion of fieldwork to accept the samples. The samples must be kept on ice; therefore, you will also need a cooler.

A Halliburton Company

A copy of the final Sampling Effort report will be sent to you when it is completed. At this time the report is scheduled for completion in October 1991.

If you have any questions, please call me at (617) 275-2970. Thank you for your cooperation.

Sincerely,

Karen Wedlock-Hunt
